c. Agency/WANG Monthly Status Meeting: During the 20 June meeting, WANG's project manager announced the TEMPEST PC delivery schedule would be 60 days after receipt of order. The two main problem areas discussed during the meeting are as follows: (1) [redacted] equipment has been shipped without prior coordination. This has resulted in the sites not being prepared and creating an extra storage cost to the Agency. In addition, many sites require cranes to assist in delivering the equipment. The leasing of such cranes must be made in advance of receipt of the equipment thus causing more problems. (2) It was brought to WANG's attention that the Agency has not been receiving documentation with each unit but rather WANG has been shipping manuals in bulk. This requires the warehouse to sort it. WANG has promised to correct procedures in both areas. [redacted]

d. Office of Communications (OC) Request For Software Support: OC has submitted a request to the Automatic Data Processing & Engineering Branch (ADP&EB/PD/OL) for a Senior Programmer and four Programmer Support personnel to provide software support to the PDP-11/44 operation system, the Z80 B terminal, and VDC display units. Discussions were held with OC personnel and it was determined that a labor-hour type contract would best fulfill the needs of the OC. A competitive Request For Proposal (RFP) will be prepared as soon as the OC provides information to ADP&EB concerning the necessary level of expertise required by the Programmers. It is anticipated that an RFP will be issued after the receipt of the aforementioned information. [redacted]

e. Armed Forces Communications and Electronics Association Convention: On 19 June 1984, [redacted] from General Procurement Branch, (GPB/PD/OL) visited the Armed Forces Communications and Electronics Association (AFCEA) Convention in Washington, DC. AFCEA annually presents technological advances achieved regarding security devices for communications and electronics equipment. The trip afforded them the opportunity to meet contractors across the country with whom they regularly interface and become more acquainted with the equipment they procure. [redacted]

3. Significant Events Anticipated During the Coming Week:

None
